Functional enrichment
BP: regulation of defense response to virus by host
BP: regulation of defense response to virus
BP: regulation of granulocyte macrophage colony−stimulating factor production
BP: cytoplasmic pattern recognition receptor signaling pathway
BP: regulation of tumor necrosis factor production
BP: regulation of tumor necrosis factor superfamily cytokine production
MF: hydrolase activity
MF: cytokine receptor activity
MF: immune receptor activity
MF: DNA binding
MF: ubiquitin binding
MF: ubiquitin−like protein binding
CC: endosome lumen
CC: bicellular tight junction
CC: tight junction
CC: apical junction complex
CC: ribonucleoprotein complex
CC: clathrin−coated endocytic vesicle membrane
Reactome: DDX58/IFIH1−mediated induction of interferon−alpha/beta
Reactome: Deubiquitination
Reactome: Cytokine Signaling in Immune system
Reactome: Diseases of carbohydrate metabolism
Reactome: Interleukin−12 signaling
Reactome: Immune System
